

# Superior Insulation Basement to Attic

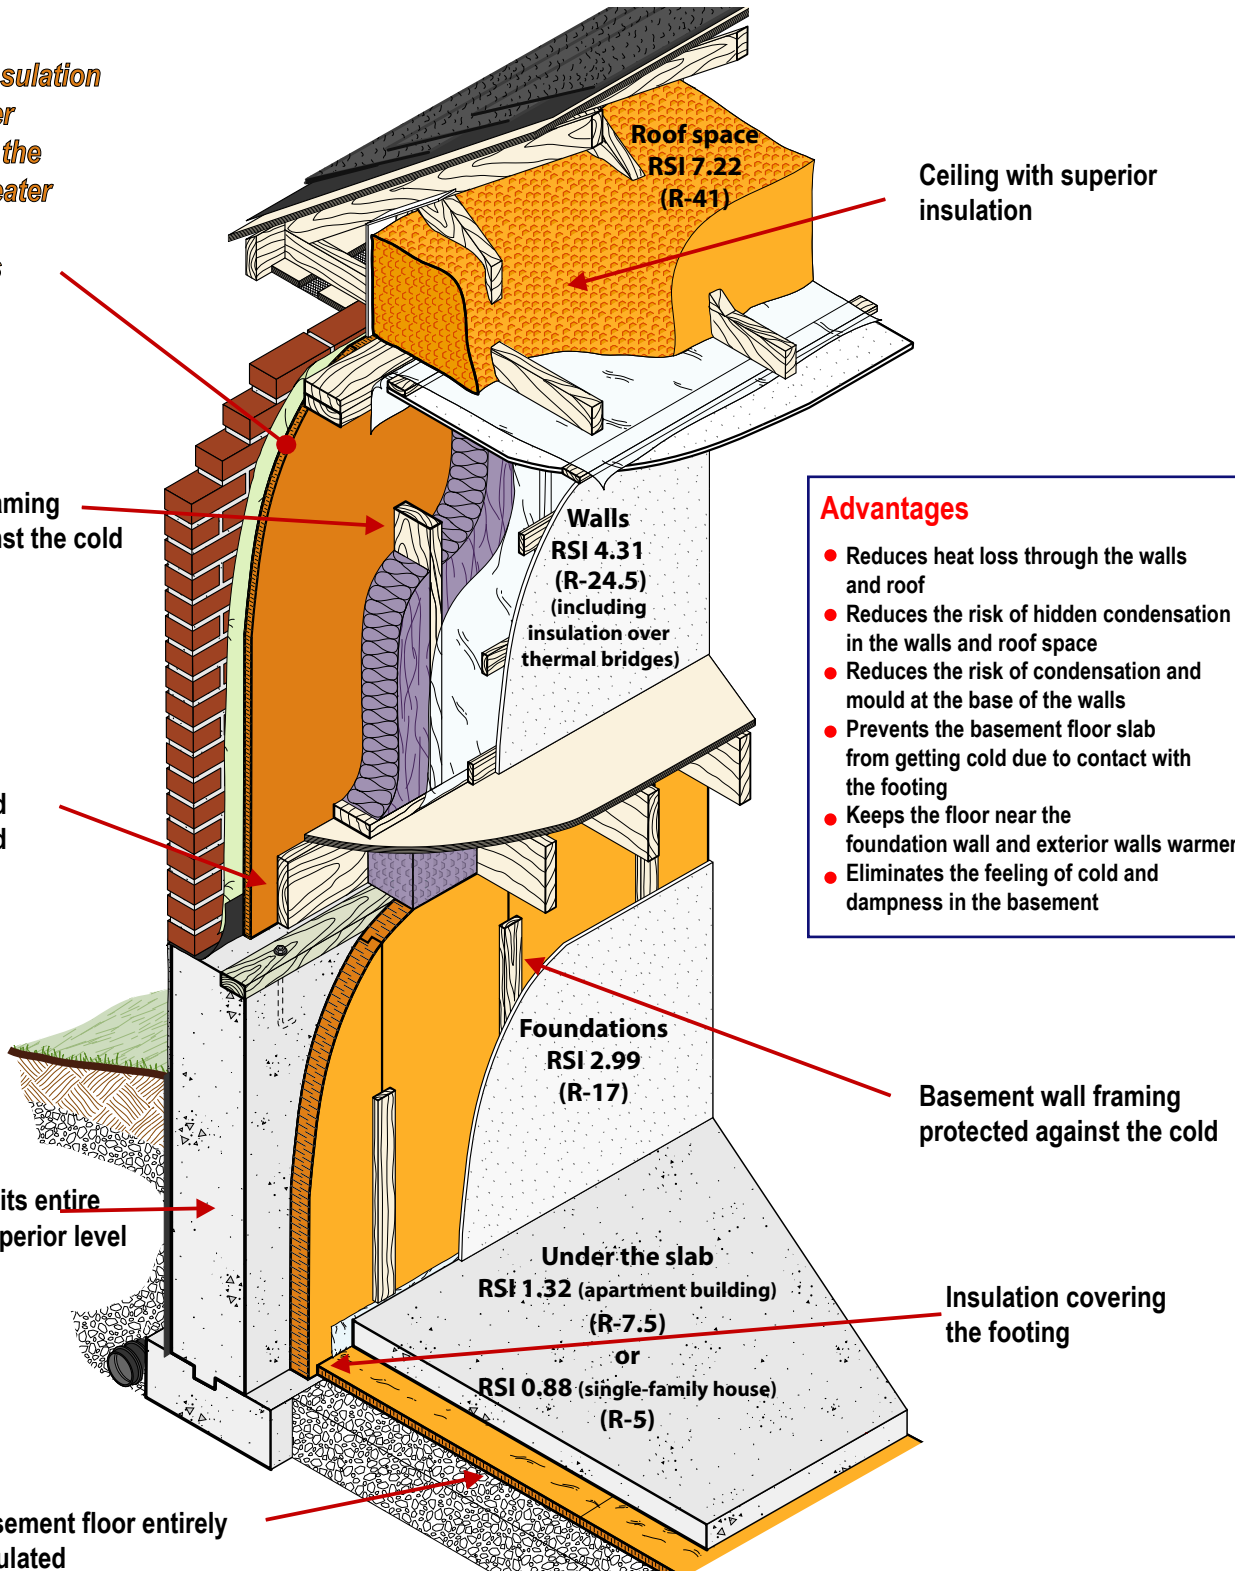

*Continuous insulation provides better protection for the house and greater comfort to the occupants*

Outside wall framing protected against the cold

Floor framing better protected against the cold

Foundation wall insulated along its entire height with a superior level of insulation

Basement floor entirely insulated

Ceiling with superior insulation

### Advantages

- Reduces heat loss through the walls and roof
- Reduces the risk of hidden condensation in the walls and roof space
- Reduces the risk of condensation and mould at the base of the walls
- Prevents the basement floor slab from getting cold due to contact with the footing
- Keeps the floor near the foundation wall and exterior walls warmer
- Eliminates the feeling of cold and dampness in the basement

Basement wall framing protected against the cold

Insulation covering the footing

Increased comfort and decreased heating bills
