

Completely Customized Ventilation Systems and Healthier Interior Air

Circulation of fresh air in all bedrooms and the living room

- Ensures good air quality for occupants and adequate air distribution throughout the house

Excess moisture evacuated via the bathrooms

- Provides more effective moisture and odour control
- Replaces noisy, high energy-consuming autonomous fans

Outdoor fresh air intake located far from any contaminants

Central ventilation system with heat recovery ventilator

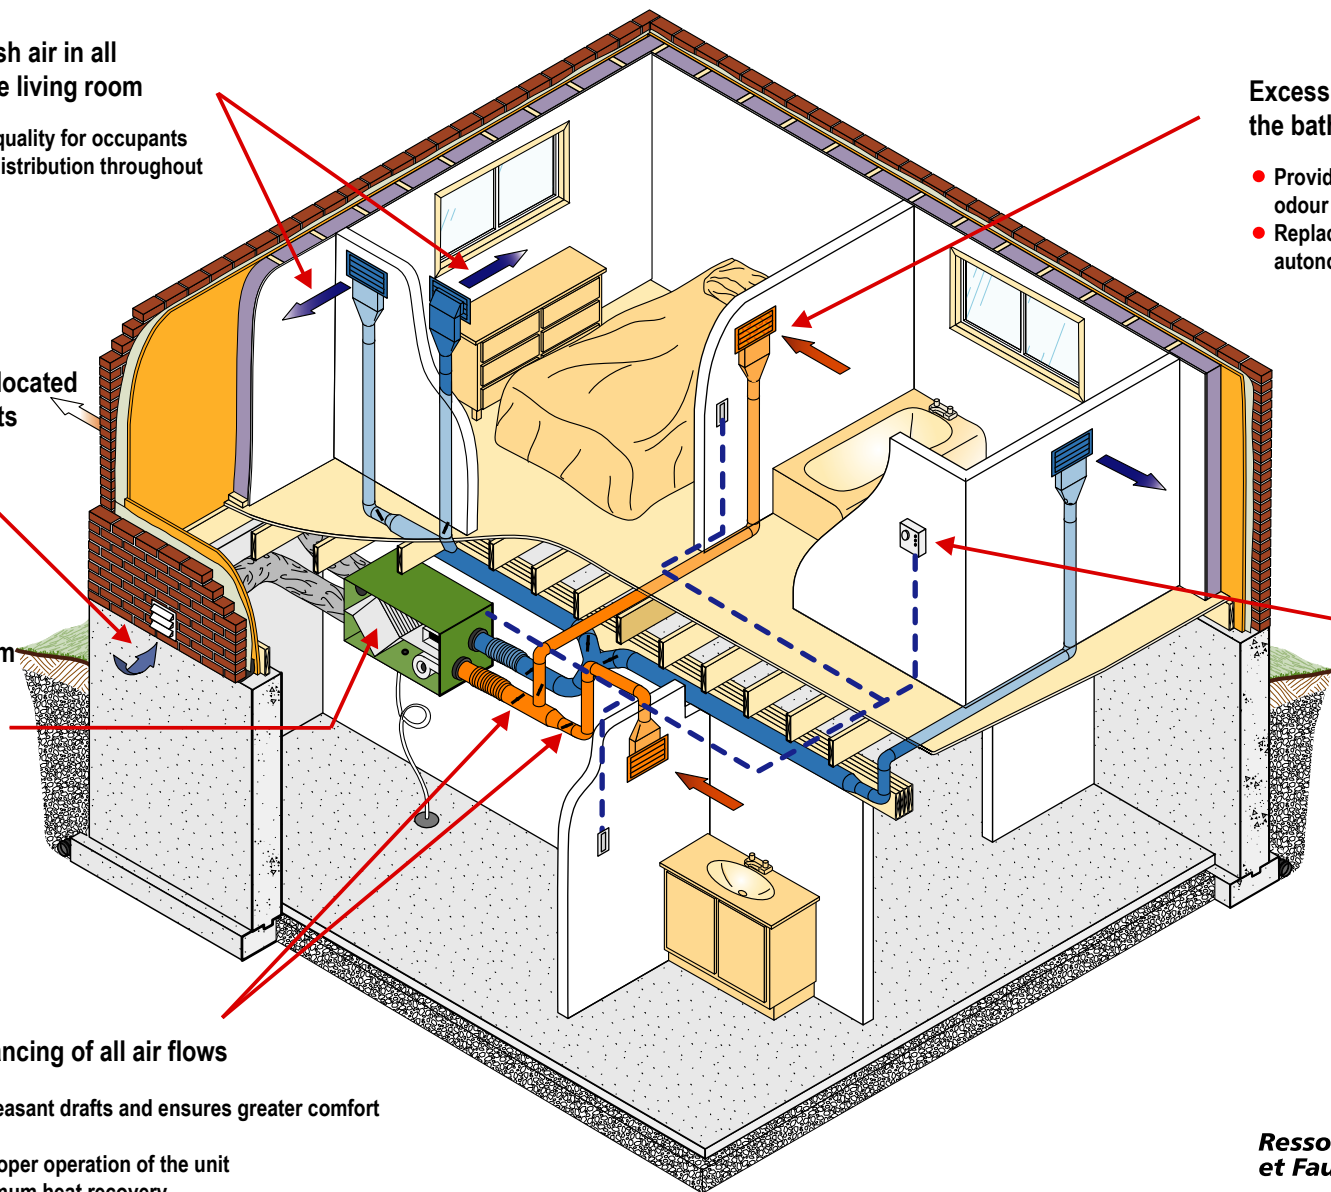

- Certified unit with superior performance
- Energy saving heat recovery core

Multifunction ventilation control

- Allows for the selection of operating mode based on specific needs
- Allows for the addition of a filter using the "recirculation" mode required by the Novoclimat® Program

Complete balancing of all air flows

- Prevents unpleasant drafts and ensures greater comfort in all rooms
- Guarantees proper operation of the unit
- Ensures maximum heat recovery
